

FTTH Drop Cable SC-SC Fiber Optical Patch Cord Simplex SM MM G657A LSZH Black

SC-SC Cable

UnitekFiber provide patch cord. Patch cord means that the terminations are connect at both ends of the optical cable to realize the optical path active connection. Optical Fiber Patch cord is similar to coaxial cable except that there is no mesh shield. The light-transmitting glass core is in the central. The fiber core has a diameter of 9/125um 50/125 μ m and 65/125 μ m for SM and multi mode fiber path cord, which is roughly equivalent to the thickness of a human hair. The diameter for single mode fiber core is 8 μ m to 10 μ m. The fiber core is wrapped by a glass which is having a lower index of refraction than the core to maintain the fiber within the core.
